ABOUT ME

I am a well-rounded Full Stack Software Engineer. I taught myself to code as a kid, learned to troubleshoot complex weapons control systems in the US Navy, and learned critical skills in creativity in college and as a touring musician.
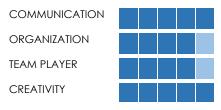

I call upon a rich & diverse background to create client-focused applications and tackle difficult problems as they arise.

SKILLS

WORK

Front End	� rating▪
Back End	
Git/Teamwork Apps	
Debugging	

PERSONAL

COMMUNICATION	
ORGANIZATION	
TEAM PLAYER	
CREATIVITY
